Third-degree atrioventricular block (AV block), also known as complete heart block, is a medical condition in which the nerve impulse generated in the sinoatrial node (SA node) in the atrium of the heart does not propagate to the ventricles.. Because the impulse is blocked, an accessory pacemaker in the lower chambers will typically activate the ventricles.

Third-degree atrioventricular block - Wikipedia

All articles in open access journals which are published by Elsevier have undergone peer review and upon acceptance are immediately and permanently free for everyone to read and download.

Osteoporosis is a disease where increased bone weakness increases the risk of a broken bone. It is the most common reason for a broken bone among the elderly. Bones that commonly break include the vertebrae in the spine, the bones of the forearm, and the hip. Until a broken bone occurs there are typically no symptoms. Bones may weaken to such a degree that a break may occur with minor stress ...

Osteoporosis - Wikipedia

Currently there are over 1,650 entries with more in the works, and all the pages are being constantly revised and improved. Links to new references and online resources are added daily, with an emphasis on those that are free and open access (FOAM websites and free-to-access journal articles). The CCC was created, and is maintained, by Chris Nickson and originated from the FCICM exam study ...
