Quantum computing is computing using quantum-mechanical phenomena, such as superposition and entanglement. A quantum computer is a device that performs quantum computing. Such a computer is different from binary digital electronic computers based on transistors. Whereas common digital computing requires that the data be encoded into binary digits (0 and 1), each of which is always in one of two ...

An algebraic number field is a finite extension of \mathbb{Q} ; an algebraic number is an element of an algebraic number field. Algebraic number theory studies the arithmetic of algebraic

Algebraic Number Theory - James Milne -- Home Page

Order theory is a branch of mathematics which investigates the intuitive notion of order using binary relations. It provides a formal framework for describing statements such as "this is less than that" or "this precedes that". This article introduces the field and provides basic definitions.

Analysis 71:411-19, 2011. This paper argues against the common view that all propositions of the form [p iff actually p] are knowable a priori by arguing (via a simple logical proof!) that some are unknowable.

Epistemology and Decision Theory – David Chalmers

The paper begins with a short theoretical review of the added mass concept and analytical methods available for the computation of added mass.

Mind: Before & Beyond Computation A Sceptical View of the Cognitive Sciences. As a scientist (speaking hypothetically), I am unable to think entirely outside of my own thought processes, or, for that matter, inside the thought processes of another.

Mathematica, Maple, and similar software packages provide programs that carry out sophisticated mathematical operations. Applying the ideas introduced in Computer Algebra and Symbolic Computation: Elementary Algorithms, this book explores the application of algorithms to such methods as automatic simplification, polynomial decomposition, and polynomial factorization.

Decision making under risk is presented in the context of decision analysis using different decision criteria for public and private decisions based on decision criteria, type, and quality of available information together with risk assessment.

CTYâ€™s mathematics, science, and computer science courses are dedicated to Dr. Richard P. Longaker, Provost of Johns Hopkins University from 1979 to 1987, in recognition of his advocacy and guidance through CTYâ€™s initial years. Mathematics can be described as a language, a tool, a science, and an ...
