Improving Transitions of Care with Health Information

The use of effective communication among patients and healthcare professionals is critical for achieving a patient's optimal health outcome. However, according to the Canadian Patient Safety Institute, ineffective communication has the opposite effect as it can lead to patient harm. Communication with regards to patient safety can be classified into two categories: prevention of adverse events ...

Patient safety - Wikipedia

Safety recommendations include: Avoid the use of abbreviations and risky dose expressions in all communication such as computer-generated labels, labels for drug storage bins or shelves, compounding recipes and protocols, and pharmacy order entry screens.
