PSYCHOLOGY 115 Remembering and Forgetting Notes MODULE-II Key Psychological Processes Encoding refers to the translation of incoming stimulus into a unique neural code that a person's brain can process. Storage is the retention of the material encoded over a period of time. Retrieval is the recovery of the stored or retained information at a later occasion.

REMEMBERING AND FORGETTING

Recall in memory refers to the mental process of retrieval of information from the past. Along with encoding and storage, it is one of the three core processes of memory. There are three main types of recall: free recall, cued recall and serial recall. Psychologists test these forms of recall as a way to study the memory processes of humans and animals. Two main theories of the process of ...
