

### **space laser communication technologies pdf**

Optical communication, also known as optical telecommunication, is communication at a distance using light to carry information. It can be performed visually or by using electronic devices. The earliest basic forms of optical communication date back several millennia, while the earliest electrical device created to do so was the photophone, invented in 1880.

### **Optical communication - Wikipedia**

Interstellar travel is the term used for crewed or uncrewed travel between stars or planetary systems. Interstellar travel will be much more difficult than interplanetary spaceflight; the distances between the planets in the Solar System are less than 30 astronomical units (AU) whereas the distances between stars are typically hundreds of thousands of AU, and usually expressed in light-years.

The goal of the Space Studies Colloquium is to bring guest researchers from the astronomical and space science communities in both industry and academia to support space-related scholarship in the Department of Space Studies and at UND and other North Dakota institutions of higher education.

### **Department of Space Studies**

(ed note: this is a commentary about the computer game Children of a Dead Earth). I see a lot of misconceptions about space in general, and space warfare in specific, so today I'll go ahead and debunk some.
