

### **tracheotomy airway management communication pdf**

Tracheal intubation, usually simply referred to as intubation, is the placement of a flexible plastic tube into the trachea (windpipe) to maintain an open airway or to serve as a conduit through which to administer certain drugs. It is frequently performed in critically injured, ill, or anesthetized patients to facilitate ventilation of the lungs, including mechanical ventilation, and to ...

Tracheotomy is a common procedure for multiple medical indications. 1 To provide safe and competent care, nursing staff must understand the immediate postoperative and long-term management of tracheostomy patients. Each institution should have its own standard policies and procedures for caring for these patients.

Tracheostomy tubes are used to administer positive-pressure ventilation, to provide a patent airway, and to provide access to the lower respiratory tract for airway clearance. They are available in a variety of sizes and styles from several manufacturers. The dimensions of tracheostomy tubes are given by their inner diameter, outer diameter, length, and curvature.
